SUMMARY

Full Stack Developer with 3 years of experience building scalable web applications using the MERN stack. Focused on delivering clean, high-performance solutions across both frontend and backend.

Experienced in designing REST APIs, developing responsive React/Next.js interfaces, and managing databases for real-world applications. Worked on AI-powered features including chat-based systems and automation workflows using OpenAI APIs, improving user experience and product intelligence.

SKILLS

Front-End: React.js, Next.js, Redux Toolkit, RTK Query, Context API, Tailwind CSS, GraphQL Integration

Back-End: Node.js, Nest.js, Python, FastApi's, TypeScript, Express.js, RESTful API Design, Mongoose, Prisma, Sequelize, Rate Limiting, Socket.io, Stripe

Databases: MySQL, MongoDB, Firebase, PostgreSQL

DevOps & Infrastructure: VPS, Vercel, Railway, Docker, Render, Heroku

Security: Auth Middleware, CORS, JWT, Zod, bcrypt

AI & Integrations: OpenAI API, Chatbase-style systems, AI automation workflows, third-party APIs

Tools: Postman, Git, GitHub, Bitbucket, ClickUp, Trello

Architecture: SaaS/PaaS, MVC, RBAC, microservice, modular design, performance optimization

Soft Skills: Effective Teamwork, Performance, user experience, crisis management

EXPERIENCE

Full Stack Developer

06/2025 - Present

Stackup Solutions

- Built and deployed end-to-end MERN applications with clean, reusable architecture.
- Integrated AI-powered features using OpenAI APIs, enabling chat-based and automated workflows.
- Optimized API performance and structured data handling using MongoDB and PostgreSQL.
- Contributed to multiple production-level applications, focusing on performance and usability.

- Developed and maintained full-stack applications using React and Node.js, delivering scalable and maintainable features.
- Designed RESTful APIs with secure authentication and efficient data handling.
- Improved frontend performance and responsiveness, enhancing overall user experience
- collaborated with cross-functional teams to deliver features across the full product lifecycle.

PROJECTS

Chatbase | RAG & Chatbot Development

Full Stack Developer

- Integrated vector databases for efficient document retrieval and improved chatbot knowledge management.
- Designed backend APIs for conversation handling, prompt management, and response generation.
- **Tech:** React.js, Node.js, Express.js, PostgreSQL

Bootcamp Wise

Full Stack Developer

- Admins manage users, attendance, permissions, tasks, and EOD submissions, with features for approval, rejection, reassignment, and level-wise task management, streamlining bootcamp operations and tracking
- Bootcampers can access tasks, submit daily EOD reports, track progress, apply for leave, view attendance.
- **Tech:** Next.js, Python, FastApi's, PostgreSQL

Trip Planner & ELD Log System

Full Stack Developer

- Built a full-stack application to generate optimized trip routes and automated driving logs.
- Implemented backend logic for route processing and trip calculations.
- Integrated map visualization and generated structured, printable log sheets.
- **Tech:** React, Python, Django, Supabase

Pet Adoption App | React Native

Full Stack Developer

- Users can browse, favorite, adopt pets, added profile management and pet uploads.
- Integrated real-time database for updates.
- **Tech:** ReactNative, Node.js, Express.js, Firebase

Education

Bachelor's of Science in Computer Science (2019-2023)
Government Collage University Faisalabad (3.65/4.0)
